Your Northern Home Fall 2016 Electricity Series

Wednesday October 12, 5:30 to 7:30 pm
Making a back-up plan for power outages
Instructor: Paul Koop of Bright Electric Services

This course will cover providing electricity to a home during a power outage. Paul will explain how to design electric circuitry to accommodate back-up power in new construction, as well as retrofitting an existing home to meet the best practices for running a generator. He will also discuss choosing, storing, and safely operating a portable electric generator.

Wednesday October 19, 5:30 to 7:30 pm
How to be a smart electricity user: tips for lowering your bills
Instructor: Emmett Leffel of Alaska Thermal Imaging, LLC

This course will provide an in-depth review on how to lower the electric bill of a home. Emmett will teach attendees to audit their own homes. Then, he will cover both simple steps to reduce a home's electric bill as well as how you can minimize the energy use of mechanical systems.

Details
