Re: Eco Green Generation LLC – FERC Form 556 [RCA File: TR1807021]

Dear Mr. Rhodes:

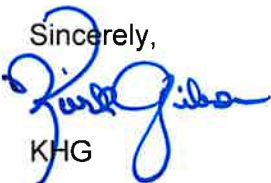

This firm represents Golden Valley Electric Association, Inc. (GVEA), with respect to the preparation of GVEA's filing with the Regulatory Commission of Alaska (RCA) in response to the interconnection request made to GVEA by Eco Green Generation LLC in a letter dated December 26, 2018.

It has recently come to my attention that the Federal Energy Regulatory Commission (FERC) has no record of the filing of a FERC Form 556 by Eco Green Generation LLC, which is required by 18 C.F.R. §§ 292.303 *et seq.* Consequently, in that Eco Green Generation LLC does not have its certification as a qualified facility from FERC, Eco Green Generation LLC has no right to receive a tariff for interconnection, integration, purchases, and sales from GVEA in accordance with applicable provisions of AS 42.05.361-42.05.441, 3 AAC 48.200 -3 AAC 48.390, and 3 AAC 50.750 - 3 AAC 50.820. Please be advised that, because of this new information, GVEA has suspended all work on its filing with the RCA until GVEA receives appropriate documentation from Eco Green Generation LLC evidencing that the proposed project by Eco Green Generation LLC has received qualifying facility certification from FERC.

If you believe that the information I received from FERC is in error, I ask that you immediately forward me a copy of the receipt and docket number that is provided to all qualified facilities by FERC once an application for self-certification is received.

Please do not hesitate to contact me should you have any questions.

Sincerely,

KHG

C: Regulatory Commission of Alaska
