

## **Carbon Reduction Study Progress Report and Public Comment May 21, 2020**

Golden Valley Electric Association has engaged the Alaska Center for Energy and Power for a CO<sub>2</sub> Reduction Study. The purpose of the study is to assist GVEA in determining the best strategies to meet the GVEA Board of Directors' goals of

- A 26 percent reduction in the rate of CO<sub>2</sub> emissions by 2030 while maintaining
- Long-term electric rate stability and
- Continued system reliability.

The study is approximately one-third complete; results and recommendations are due to GVEA by the end of summer 2020.

ACEP is offering a GVEA Carbon Reduction Study Progress Report with public comment opportunity on Thursday, May 21, at 6:30 pm via Zoom conference. The purpose of the workshop is two-fold:

- To report to GVEA member-owners on study progress and initial findings; and
- To seek input from GVEA member-owners on additional options and issues that should be considered by the study team.

While the original progress report plan was for an in-person meeting, current social distancing rules and prudent procedures required the workshop and comment opportunity to be online. Interested members of the public will be able to sign into the Zoom address below but will be muted until the public comment period begins. The moderator will call on individuals and unmute individual microphones as each person is called. Individuals may also comment and ask questions using the Zoom chat function.

To participate in the meeting by computer audio and video

Join the Zoom meeting on May 21<sup>st</sup> at 6:30 pm using the following URL:

<https://us02web.zoom.us/j/85377731708?pwd=dGFoNWY5MVNBWFdhNVFtY3Y5SEUwdz09>

Meeting ID: 853 7773 1709 and Password 692886

To participate in the meeting by telephone, join the Zoom meeting at (253) 215-8782 using the same Meeting ID and password. Please note that telephone participants will not be able to view the presentation slides or text comments by other participants.
